C++, SQL, JavaScript, React, Next, Node, Express, MongoDB, Mongoose, AWS, TailwindCSS, MySQL, Docker, Git-Github

Education

B.Tech in Computer Science and Engineering with Specialization in Internet of Things
Institute of Engineering and Management
Sep 2022 - May 2026

Certifications

- Complete full-stack Web development - (Udemy)

Projects

Country-info App

Developed a responsive Country Information web application where users can view the information of any country using React, HTML, CSS, and APIs to fetch and display real-time country data in a structured JSON format.

E-mandi App

Developed an app that facilitates farmer's work in selling their product in a much more organized and systematic manner and minimum linkage with middlemen, enabling farmers to sell their products online without the need to travel.

Chat Tool

Developed an AI-integrated web application similar to Chat GPT using React, Tailwind CSS, and AI Tool to facilitate natural language conversations and provide automated responses.
